

# NHD-C12864LZ-FSW-FBW-3V3

## COG (Chip-On-Glass) Liquid Crystal Display Module

NHD- Newhaven Display C12864- 128 x 64 Pixels

LZ- Model

F- Transflective

SW- Side White LED backlight

F- FSTN (+)

B- 6:00 Optimal View Wide Temperature 3V3- 3V<sub>DD</sub>, 3V Backlight

**RoHS Compliant** 

### Newhaven Display International, Inc.

2661 Galvin Court Elgin IL, 60124

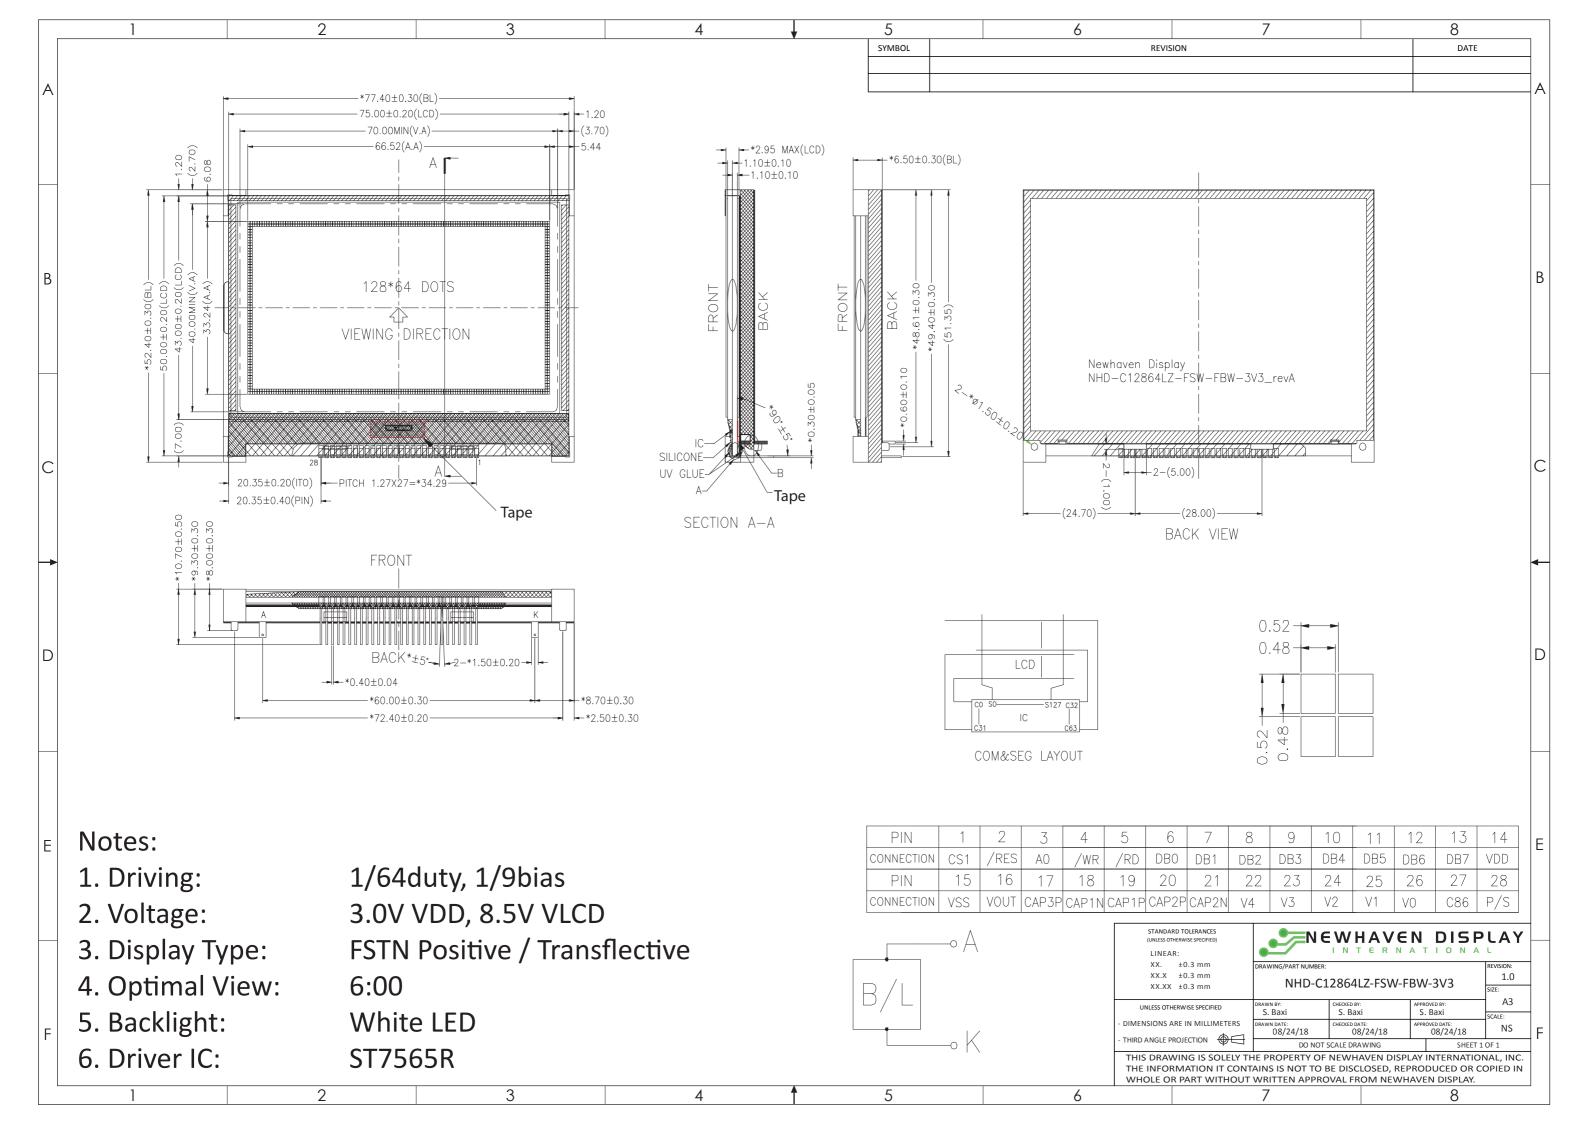

Ph: 847-844-8795 Fax: 847-844-8796

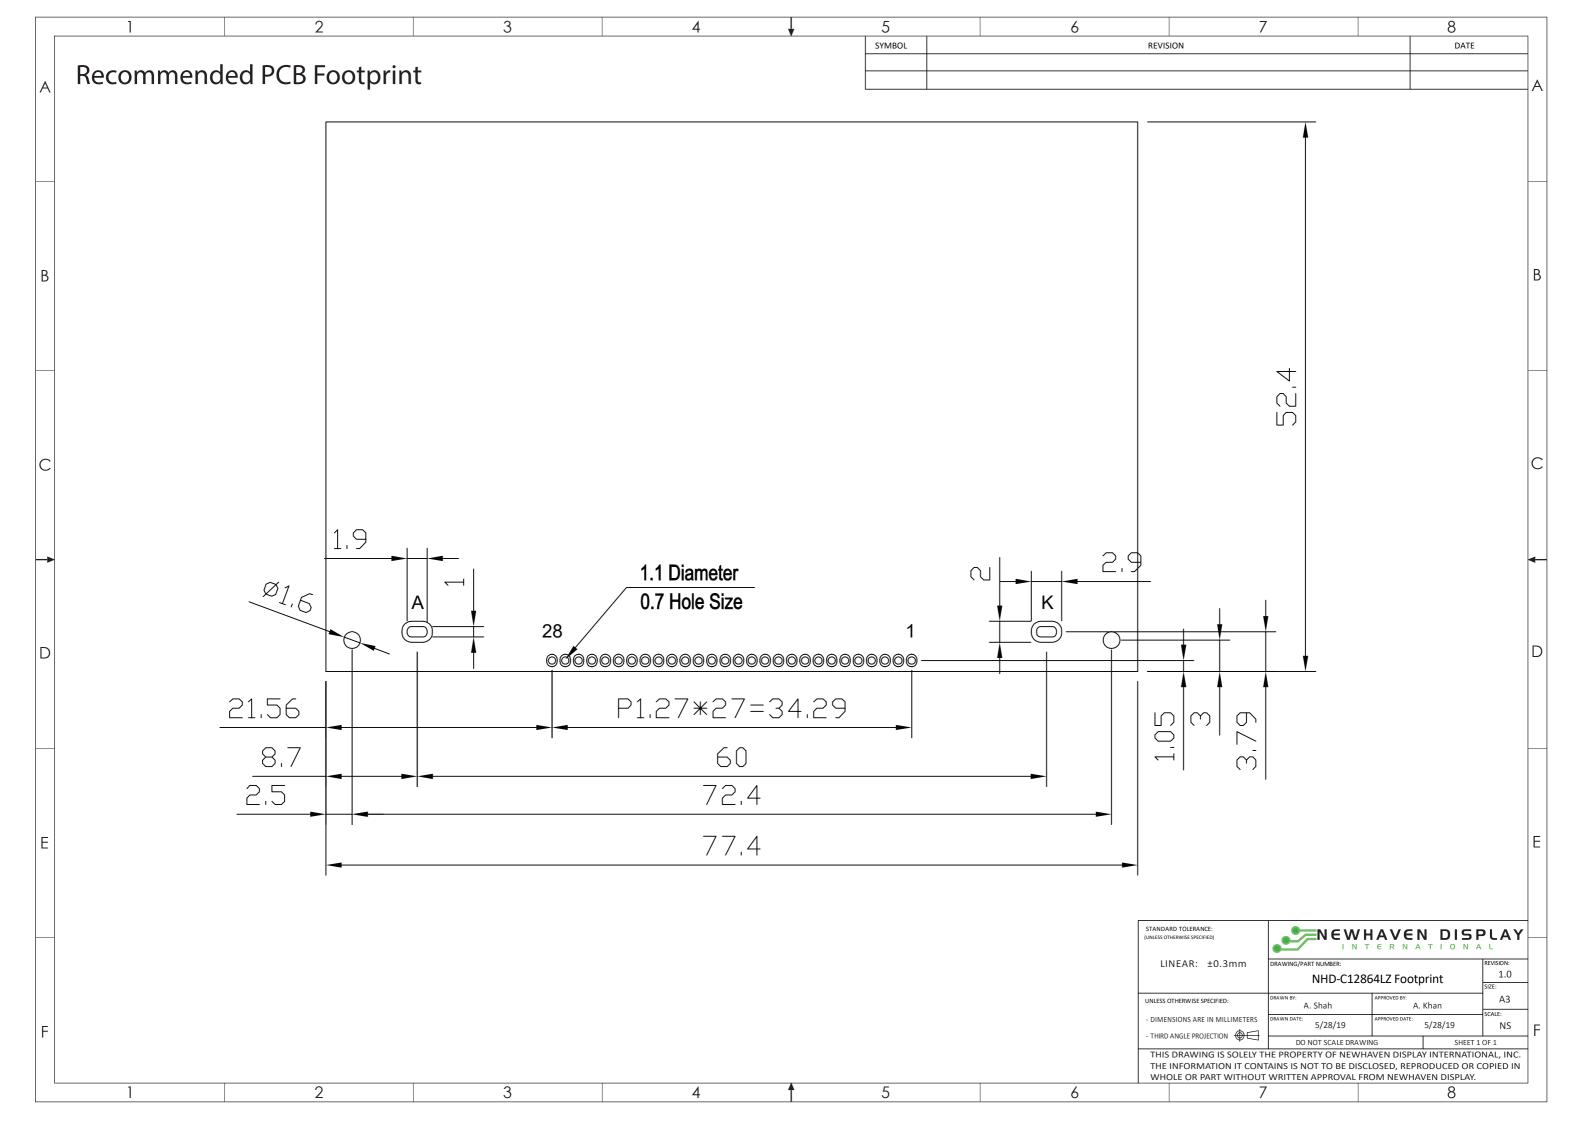

### **Document Revision History**

| Revision | Date     | Description  | Changed by |
|----------|----------|--|------------|
| 0        | 1/10/10  | Initial Release  | MC         |
| 1        | 7/7/11   | Packaging Procedure added                                    | AK         |
| 2        | 12/12/12 | Example initialization program updated                       | AK         |
| 3        | 4/10/13  | Serial interface timing added                                | AK         |
| 4        | 3/17/15  | Pin Description updated                                      | RM         |
| 5        | 10/16/15 | Mechanical Drawing Updated                                   | TJ         |
| 6        | 6/29/16  | Electrical and Optical Characteristics Updated               | SB         |
| 7        | 10/27/16 | Electrical Characteristics and Mechanical Drawing Updated    | TM         |
| 8        | 7/26/17  | Backlight Redesign & LCD Panel Changed for Improved Contrast | SB         |
| 9        | 8/24/18  | Note Added to Drawing  | SB         |
| 10       | 5/28/19  | Added PCB Footprint Drawing & Recommended Breakout Board     | AS         |

### **Functions and Features**

- 128 x 64 pixels
- Parallel / Serial MPU interface
- Built-in ST7565R-G Controller
- +3.0V power supply
- 1/65 duty cycle; 1/9 bias
- RoHS Compliant

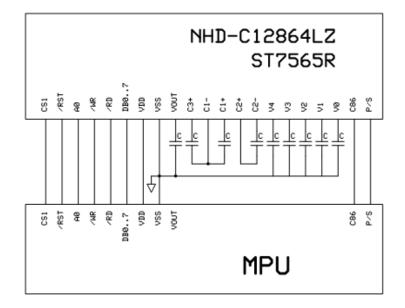

## Pin Description and Wiring Diagram

| Pin No. | Symbol         | External Connection | Function Description                                      |
|---------|----------------|---------------------|---|
| 1       | /CS1           | MPU                 | Active LOW chip select                                    |
| 2       | /RES           | MPU                 | Active LOW Reset signal                                   |
| 3       | A0             | MPU                 | Register select signal. 0: instruction; 1: data register  |
| 4       | R/W            | MPU                 | 6800 Mode: Read/Write select signal. R/W=1: Read R/W: =0: |
|         | /WR            |                     | Write   |
|         |                |                     | 8080 Mode: Active LOW Write Signal                        |
| 5       | E              | MPU                 | 6800 Mode: Active HIGH Enable Signal                      |
|         | /RD            |                     | 8080 Mode: Active LOW Read Signal                         |
| 6       | DB0            | MPU                 | Parallel Interface  |
| 7       | DB1            | MPU                 | DB0-DB7: Bi-directional 8-bit data bus                    |
| 8       | DB2            | MPU                 |   |
| 9       | DB3            | MPU                 | Serial Interface:   |
| 10      | DB4            | MPU                 | DB0-DB5: No connect in serial mode                        |
| 11      | DB5            | MPU                 | DB6= Serial clock (SCL)                                   |
| 12      | DB6            | MPU                 | DB7= Serial data input (SI)                               |
| 13      | DB7            | MPU                 |   |
| 14      | $V_{DD}$       | Power Supply        | Supply Voltage for LCD and logic (+3.0V)                  |
| 15      | Vss            | Power Supply        | Ground  |
| 16      | Vout           | Power Supply        | Connect to 1uF cap to VSS                                 |
| 17      | CAP3+          | Power Supply        | Connect to 1uF cap to CAP1- (PIN-18)                      |
| 18      | CAP1-          | Power Supply        | Connect to 1uF cap to CAP3+(PIN17) and CAP1+(PIN19)       |
| 19      | CAP1+          | Power Supply        | Connect to 1uF cap to CAP1- (PIN-18)                      |
| 20      | CAP2+          | Power Supply        | Connect to 1uF cap to CAP2- (PIN-21)                      |
| 21      | CAP2-          | Power Supply        | Connect to 1uF cap to CAP2+ (PIN-20)                      |
| 22      | $V_4$          | Power Supply        | 1.0uF-2.2uF cap to VSS                                    |
| 23      | V <sub>3</sub> | Power Supply        | 1.0uF-2.2uF cap to VSS                                    |
| 24      | V <sub>2</sub> | Power Supply        | 1.0uF-2.2uF cap to VSS                                    |
| 25      | V <sub>1</sub> | Power Supply        | 1.0uF-2.2uF cap to VSS                                    |
| 26      | V <sub>0</sub> | Power Supply        | 1.0uF-2.2uF cap to VSS                                    |
| 27      | C86            | MPU                 | MPU interface Select pin. C86=H: 6800; C86=L: 8080        |
| 28      | PS             | MPU                 | Parallel/Serial select. PS= H: Parallel; PS=L: Serial     |

LCD connector: 1.27mm pitch pins.

Backlight connector: 1.5mm wide pins.

Recommended Breakout Board: NHD-PCB40

### **Electrical Characteristics**

| Item                        | Symbol           | Condition               | Min.                  | Тур. | Max.                  | Unit |
|-----------------------------|------------------|-------------------------|-----------------------|------|-----------------------|------|
| Operating Temperature Range | Тор              | Absolute Max            | -20                   | -    | +70                   | °C   |
| Storage Temperature Range   | T <sub>ST</sub>  | Absolute Max            | -30                   | -    | +80                   | °C   |
| Supply Voltage              | $V_{DD}$         | -                       | 2.7                   | 3.0  | 3.3                   | V    |

```

## **Packing Procedure**

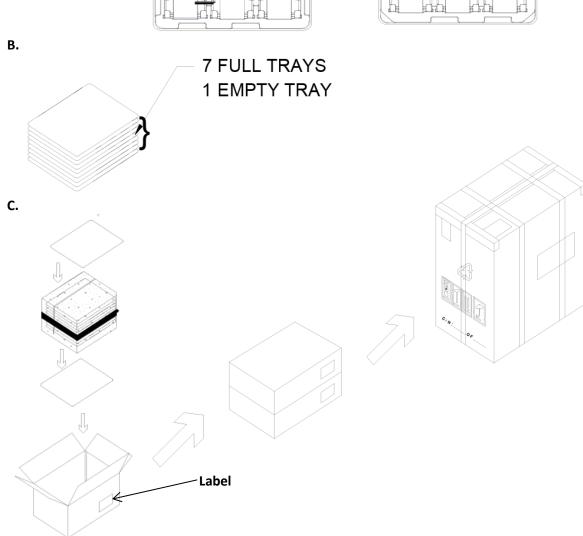

1. Packing Materials

| NO. | Item   | Dimensions (LxWxH) (mm) | Quantity |
|-----|--------|-------------------------|----------|
| 1   | Tray   | 366x296x21.1            | 15       |
| 2   | Box    | 382x310x165             | 105      |
| 3   | Carton | 400x321x363             | 210      |

### 2. Packing Method

### A. Place display on the tray & Rotate Stacked trays by 180°

## **Quality Information**

| Test Item                                | Content of Test   | Test Condition   | Note |
|--|---|--|------|
| High Temperature storage                 | Endurance test applying the high storage temperature for a long time.   | +80°C , 48hrs  | 2    |
| Low Temperature storage                  | Endurance test applying the low storage temperature for a long time.  | -30°C , 48hrs  | 1,2  |
| High Temperature<br>Operation            | Endurance test applying the electric stress (voltage & current) and the high thermal stress for a long time.                    | +70°C , 48hrs  | 2    |
| Low Temperature<br>Operation             | Endurance test applying the electric stress (voltage & current) and the low thermal stress for a long time.                     | -20°C , 48hrs  | 1,2  |
| High Temperature /<br>Humidity Operation | Endurance test applying the electric stress (voltage & current) and the high thermal with high humidity stress for a long time. | +40°C, 90% RH, 48hrs   | 1,2  |
| Thermal Shock resistance                 | Endurance test applying the electric stress (voltage & current) during a cycle of low and high thermal stress.                  | -0°C, 30min -> 25°C, 5min -> 50°C, 30min = 1 cycle<br>For 10 cycles                    |      |
| Vibration test                           | Endurance test applying vibration to simulate transportation and use.   | 10-55Hz, 1.5mm amplitude.<br>60 sec in each of 3 directions<br>X,Y,Z<br>For 15 minutes | 3    |
| Static electricity test                  | Endurance test applying electric static discharge.  | VS=800V, RS=1.5kΩ, CS=100pF<br>One time  |      |

Note 1: No condensation to be observed.

Note 2: Conducted after 4 hours of storage at 25°C, 0%RH.

**Note 3:** Test performed on product itself, not inside a container.
